

Sonu Kumar Singh

Frontend Software Engineer

singhsonu89860@gmail.com | +91 7643055134 | singhsonu-dot/crm-dashboard |

Professional Summary

Frontend Software Engineer with hands-on experience building and deploying production-style React applications using JavaScript, Tailwind CSS, and Supabase. Built secure authentications, CRUD workflows, protected routes, REST API integrations, and responsive user interfaces. Focused on building scalable, user-focused web applications.

Projects

CRM Dashboard

Github:- singhsonu-dot/crm-dashboard | Live Link:- CRM-Dashboard

- Deployed a production-grade CRM Dashboard utilizing **TanStack Query** for advanced server-state caching, eliminating redundant network overheads, and managing clean loading/error states.
- Architected secure user session boundaries and multi-provider social authentication flows via Google OAuth proxies using Supabase BaaS infrastructure.
- Mitigated Cumulative Layout Shift (CLS) by implementing route-based lazy-loading code splits and custom Tailwind CSS dynamic pulse shimmer loaders to manage network request latency.

Skills

Frontend

- React
- JavaScript (ES6+)
- HTML5
- Tailwind CSS
- TanStack Query
- React Router V6 (Auth-guards)

Backend Integration

- Supabase (BaaS)
- PostgreSQL Schemas
- Multi-provider OAuth (Google, Github)
- Rest APIs Integration

Tools

- Git
- Github
- Vite
- VS Code

Professional Development

Self-Taught Software Engineer Focused Full-Stack Systems Exploration & Continuous Learning (2+ Years Framework Practice)
